Andean Offering Ceremony

In this men's retreat we will do an Andean Offering Ceremony taken from the Andean vision of the cosmos. It's comprised of a sacred offering to mother earth. Each participant will offer up a natural symbolic element like a seed, flower, or leaf that represents the deepest intentions of the participant. It's through this offering that we connect with the earth and raise our energies up. At the end of the retreat the offering will be offered up to the sacred fire to be transmuted causing the energies and intentions to reach an even higher state of consciousness.

This is how we will honor one another, the earth, and cultivate gratitude transforming our energies in harmony and balance.

Constellations Through our systemic therapy and family constellations work deep dynamics will be revealed and put in order.

Inherited and ancestral burdens are relieved enabling each man to occupy his station with added clarity, dignity, and strength.

We integrate the experience through a special conscious meditation to calm the noise of the mind, empower the body, and to bring insight and clarity to the experience in the presence of internal truth.

Cacao Ceremony

A sacred ritual of intergration and opening the heart chakra. Cacao, a master of plants, unites us to honor our unique path and lived experiences, grounding in our hearts the lessons we have learned in presence and gratitude.

It's not a matter of correcting a man in censor, but an invitation to remember who he is. A reconciliation with the past and a coming back into the heart space in authenticity and truth.

Kambo Ceremony

An ancestral treatment from the Amazonian tribes, utilizing the natural secretion of the Phyllomedusa Bicolor frog. The cocktail of bioactive peptides has a profound impact on the body's nervous system activating it's own ability to heal itself.

Benefits:

More energy, mental clarity, and emotional stability.

Fortifying a more robust immune system.

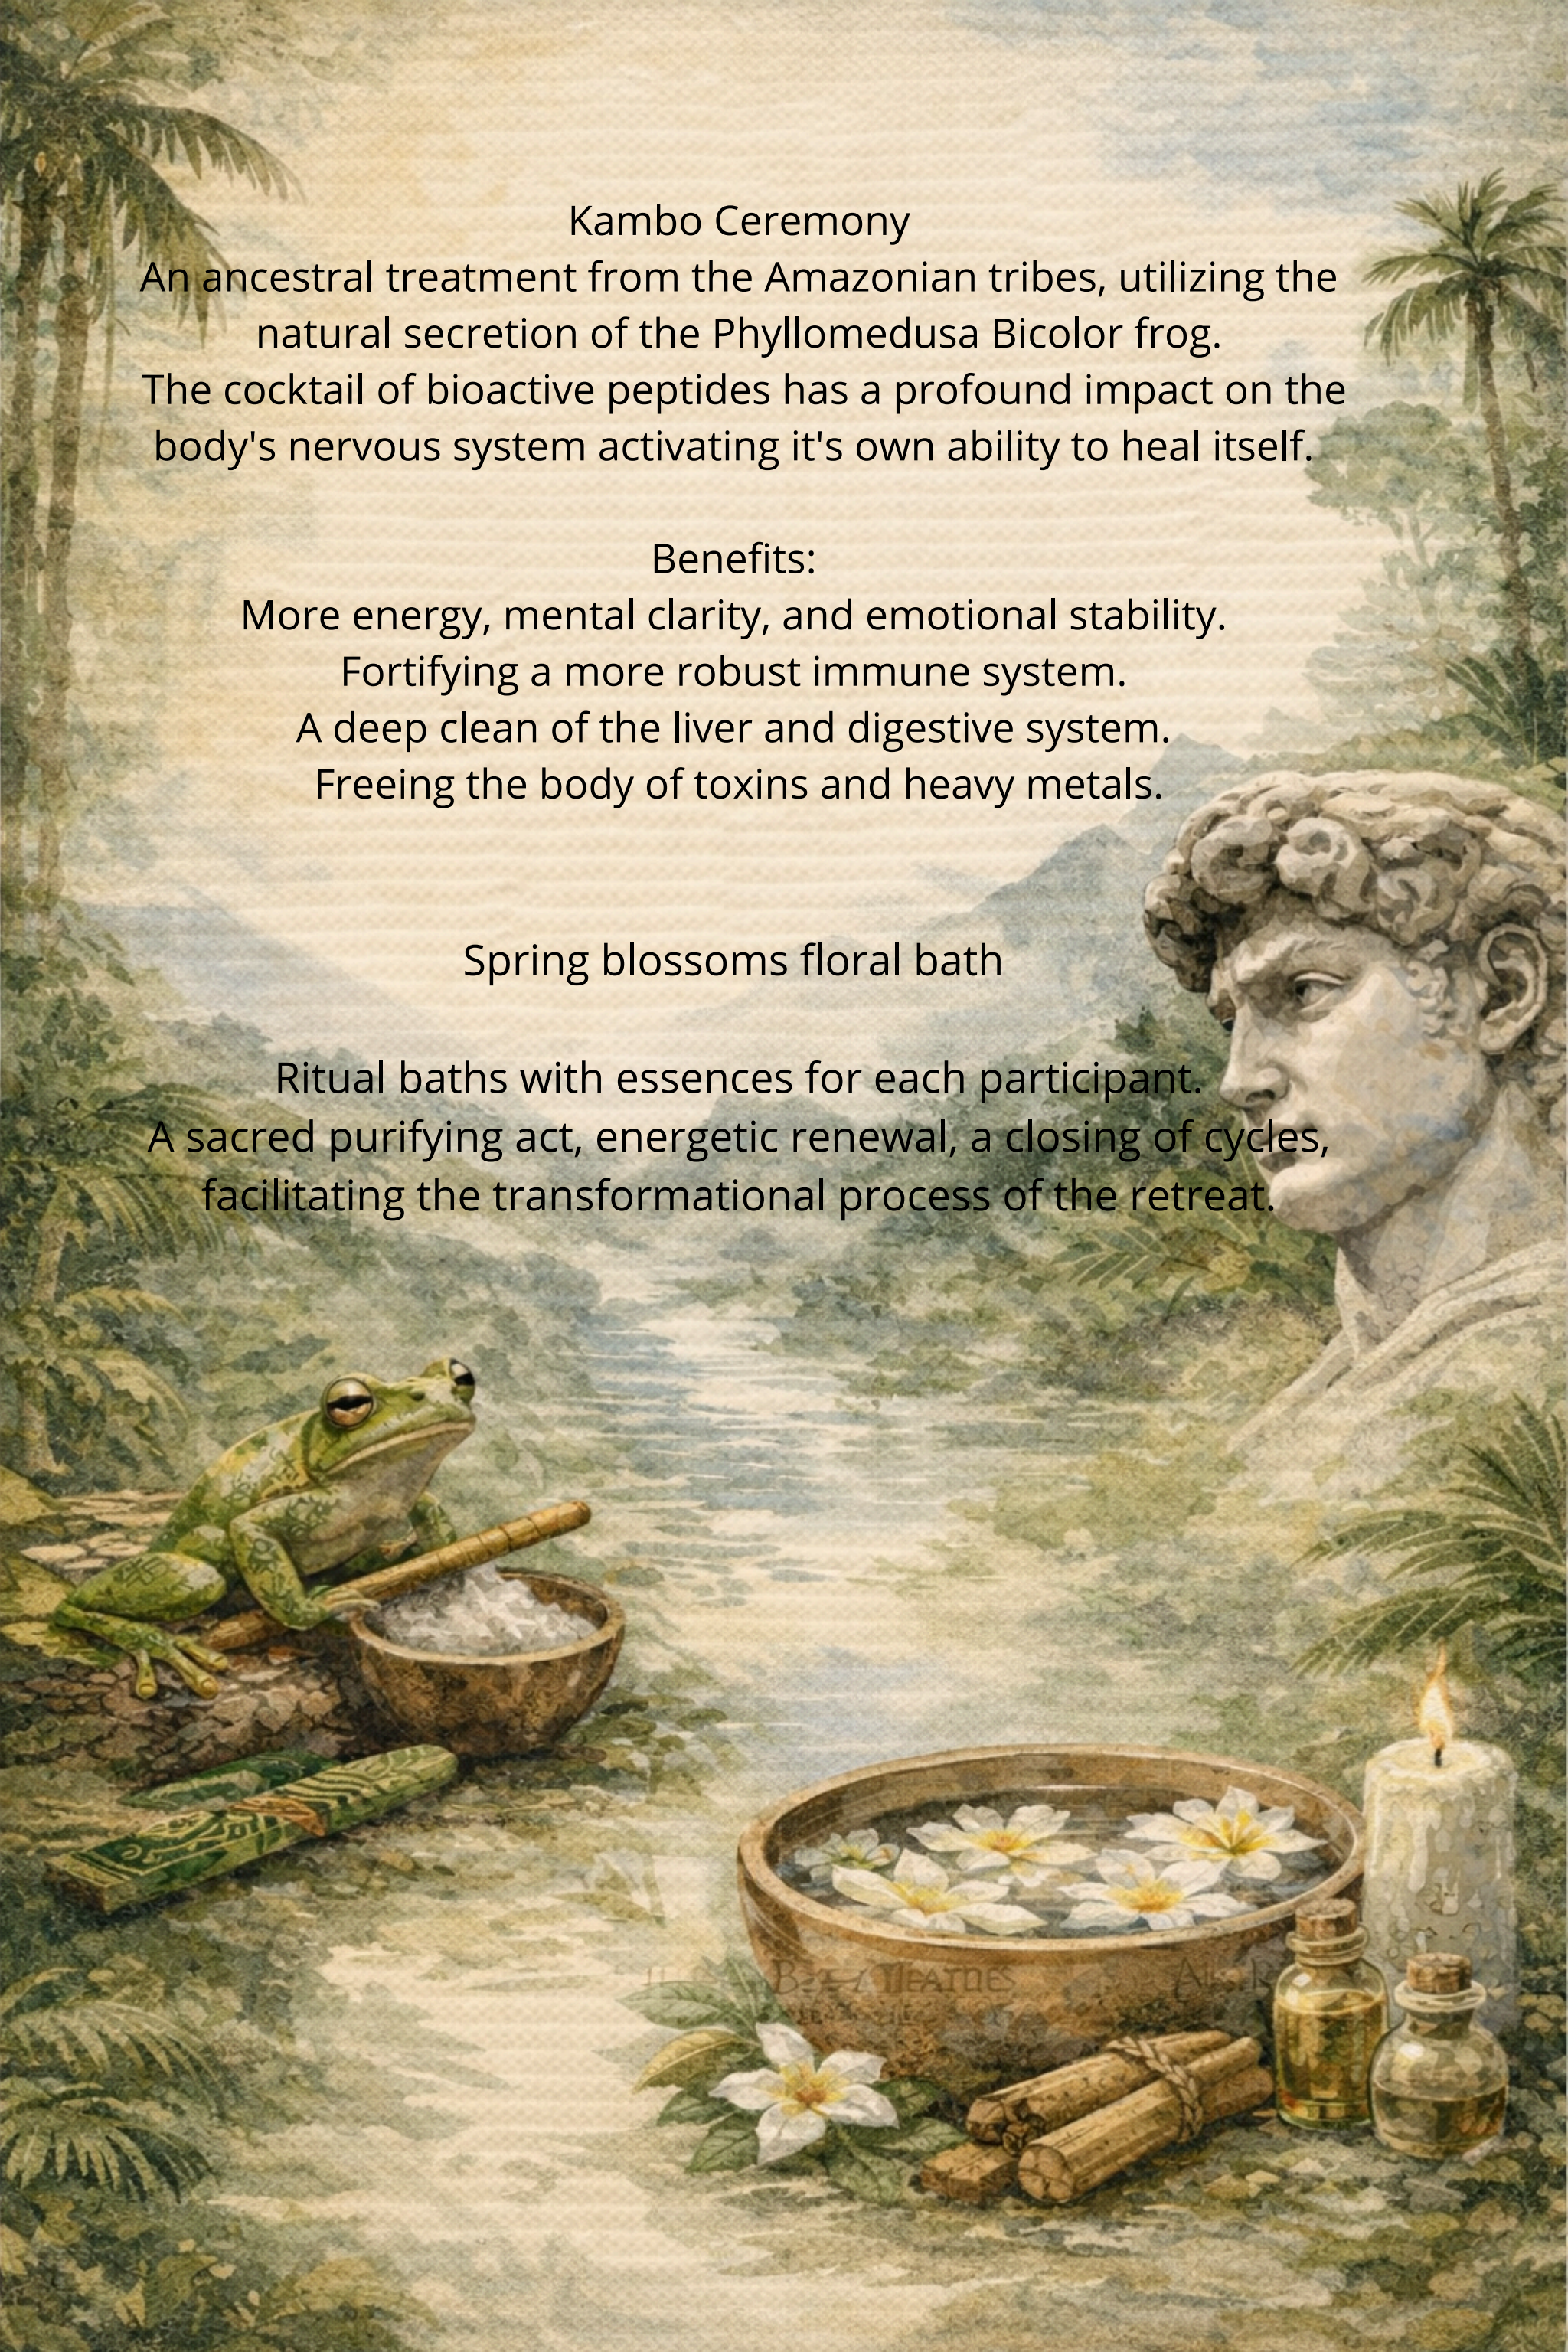

A deep clean of the liver and digestive system.

Freeing the body of toxins and heavy metals.

Spring blossoms floral bath

Ritual baths with essences for each participant.

A sacred purifying act, energetic renewal, a closing of cycles, facilitating the transformational process of the retreat.

Qigong Meditation:

An energetic practice at sunrise to activate and circulate chi.

We learn to nurture the vital life force consciously elevating it and transmuting it into higher chakras, reducing dependency on external stimulants like caffeine.

Tantric Group Massage

A guided ritual where we learn to stimulate and elevate more chi through tantric breathwork, conscious touch, and moving energy.

Inspired by tantric tao and qigong in a structured and safe group setting to regenerate the brain, body, and vital life force for healing and manifestation with personal and group intentions.

Celebration Ecstatic Dance Ecstatic Dance: A profound experience connecting through music, sound, and vibration. With a live set of music and an optional microdose of psilocybin, we set the body free to move joyfully letting go of tension and making space for the soul to express itself judgment free.
